

Allsteel®

We take complete responsibility for what we make and how we make it.

Designed and manufactured to have minimal impact on both the physical and social environment, Acuity has been Cradle to Cradle Certified™ by MBDC, the company that pioneered the concept.

Made with no PVC components.
Recycled content is above 45%.

Strict water stewardship guidelines have been followed.

Green-E certified wind renewable energy certificates offset 100% of the energy used to assemble Acuity chairs.

We will take back, break down, recycle, and/or reclaim the chairs at the end of their useful life.

We follow fair labor practices as well as a range of other socially responsible initiatives and benchmarks.

Acuity has been awarded SCS Indoor Advantage™ Gold Certification.

Acuity Statement of Line

High-Back Work Chair
See price list for model numbers.

Designed with an Italian sensibility and American ingenuity, in collaboration with Milan-based Design Continuum Italia.

Acuity™

Elegant.

Everything inessential has been stripped away, leaving behind only purity of form.

Sensual.

An embrace across the shoulders, down the back, along the arms, behind the legs.

Inviting.

Step up, sit down, discover an entirely new sitting experience.

What the eye perceives,

the body confirms.

What the eye perceives,

bottom half of vertical gatefold--
white area does not print; sheet would be trimmed to black edge of image.

Embracing.

A shape that reflects the human body supports the human body.

A mesh back mirrors the spine, providing ergonomic fit to the shoulders and lumbar simultaneously and continuously. Mechanical dynamics in the materials and structure of the carrier promote healthy posture by allowing just the right amount of flex.

A customized, hybrid cushion ensures comfort immediately when you sit and after hours at your desk.

A weight-activated mechanism responds to body weight and keeps the seat and back moving in relation to one another during recline, providing the ideal amount of support.

We call it AcuFit.™

You'll call it a new kind of comfort.

Fit-to-body: Move the seat up, down, back, and forth with just the touch of a fingertip.

Intuitive.

Organized to accommodate the reach of your eyes and your arms.

Eight-way positioning: Type, talk, or slip the arms right out of your way for easy get up and go.

Fit-to-task: Get into the zone with a simple slider that locks, tightens, or loosens the tilt.

The transformation of what's
purposeful into what's beautiful.

We began by building a team. Ergonomists. Physical therapists. Researchers. And Bruce Fifiield of Milan-based Design Continuum Italia to lead the design. Then we watched so we could learn. What do people want from their chairs? How do they touch them, sit in them, swivel, lean back, lean forward, get to work? We examined what they need from their chairs. Ergonomics that work seamlessly, controls that work intuitively, posture maintained invisibly. We scrutinized every detail. Mesh that breathes, a yoke that flexes, aluminum that recycles, cushioning that soothes, stitching that whispers, a leather jacket that speaks with confidence. And we created a chair that enhances any environment, any body.

Discover new Acuity.
Clearly sharp. Clearly comfortable.
